## Summary

The Northwest Florida Water Management District (NFWWMD) In-Lieu Fee (ILF) Mitigation Program is derived from an expired, ILF-type, wetlands mitigation program established by agreement between the US Army Corps of Engineers (USACE), Jacksonville District, and the NFWWMD in July 2006. To comply with the USACE / US Environmental Protection Agency 2008 Final Rule on compensatory mitigation (“Compensatory Mitigation for Losses of Aquatic Resources”; 33 CFR Parts 325 and 332; 40 CFR Part 230), seven mitigation projects, originally established under the 2006 agreement, were incorporated into the NFWWMD ILF Program. In 2021, the Live Oak Peninsula ILF project was expanded to include the Live Oak Point Living Shoreline project.

The ILF program Final Instrument was approved by the USACE on March 18, 2015 (Permit SAJ-2011-00287-TMF). The intent of the NFWWMD ILF Program is to provide compensatory mitigation options to the Florida Department of Transportation (FDOT) for areas not presently served by private mitigation banks or where appropriate bank credits, as determined by the USACE, are not available. Use of the ILF program by non-FDOT entities is allowed only with concurrence from FDOT and if deemed acceptable under Florida statutes.

This “2023 Annual Report” has been developed to comply with reporting requirements (financial, credit balances, and assurances of long-term management funding) described in sections 7.3, 7.4, and 10.2 of the NFWWMD In-Lieu Fee Final Instrument (Final Instrument). Per these sections, an “annual program report,” an “annual report on financial assurances and long-term management funding,” and a “summary accounting statement” must be submitted to the USACE by March 31<sup>st</sup> of each year. The intent of this report is to provide an overview of the operation of the NFWWMD ILF Program for Calendar Year 2022 (1/1/2022 – 12/31/2022). Ecological monitoring reports for individual ILF sites used to determine if performance standards are being met or if adaptive management is necessary are site-specific, have varying reporting requirements, are submitted separately to the USACE, and are not included in this report.

The NFWWMD ILF Program is functioning as designed. It is financially sound and able to provide high levels of assurance that long-term management will be funded in perpetuity.

## Program Report

### Income received and interest earned

In Calendar Year 2022, the NFWWMD received \$958,052.27 from FDOT for the reservation and sale of mitigation credits from ILF Program projects. As allowed by the Final Instrument, these funds are deposited into a single, dedicated mitigation account (Fund “A”) used exclusively for ILF and non-ILF mitigation projects. Expenditures and revenues are tracked individually for each ILF project using Munis software (Tyler Technologies, Inc., a developer of financial software for public sector needs).

At the beginning of 2022, Fund “A” had a balance of \$15,953,495.41 held at Florida PRIME (Figure 1); the ending balance for 2022 was \$14,843,038.90 (Figure 2). Earned interest on Fund

“A” for 2022 was \$261,231.98. All earned interest (4.30% rate as of 12/31/2022) remains in Fund “A” and will be used to implement and maintain NFWFMD mitigation projects. Currently, \$4.5 million within Fund “A” is reserved for ILF projects; this figure may be adjusted as necessary to guarantee implementation and funding for perpetual management of all ILF projects.

#### A list of all permits for which NFWFMD ILF Program funds were accepted

In 2022, the NFWFMD ILF Program provided a total of 4.69 federal mitigation credits for wetland impacts authorized by four State 404 permits (Figure 3; Table 1). A total of \$958,052.27 was received for the 4.69 federal credits debited to comply with the State 404 permits (Table 1). Palustrine forested mitigation credits were provided from the Shuler and Yellow River Ranch ILF sites, palustrine emergent credits were provided from the Yellow River Ranch ILF site, and estuarine emergent credits were provided from the Live Oak Point Living Shoreline ILF site. In accordance with the Final Instrument, the amount of funds received from FDOT for mitigation credits provided was governed by section 373.4137, Florida Statutes.

#### A description of NFWFMD ILF Program expenditures

From inception under the Umbrella Plan through 12/31/2022, a total of \$14,583,889.08 has been expended on the seven mitigation projects that comprise the ILF Program. Expenditures were for land acquisition, planning, construction, monitoring, maintenance, contingencies, adaptive management, administration, and salaries. Non-ILF expenditures are not included in this total.

In 2022, the NFWFMD expended \$511,743.27 on ILF projects (Table 2). This amount includes funds obligated for activities implemented in 2021 and paid in 2022; funds obligated for activities implemented in 2022 and paid in 2023 are not included. Expenditures in 2022 are apportioned as follows: land acquisition \$0; planning costs \$0; construction costs \$237,473.06; monitoring costs \$31,400.47<sup>1</sup>; maintenance costs \$0; contingency costs \$0; adaptive management costs \$230,908.55; administration costs \$10,428.19. In 2022, \$27,283.00 was obligated for Fall 2022 monitoring to be paid for in Calendar Year 2023.

The program expenditure categories used in this report (i.e., land acquisition, planning, construction, monitoring, maintenance, contingencies, adaptive management, and administration) were derived from language in the USACE / US Environmental Protection Agency 2008 Final Rule and incorporated into the NFWFMD In-Lieu Fee Final Instrument. For the purposes of this report, maintenance costs are defined as those expenditures that would be associated with long-term management (not including monitoring) after site release by the USACE. Because no sites have been released, maintenance costs are \$0. Contingency costs, when applicable, would be associated with unanticipated expenditures associated with catastrophic events (e.g., unscheduled repair or replacement of a low-water-crossing after an extreme flood event). To date, there have

---

<sup>1</sup> This amount (\$32,933.47) paid in Calendar Year 2022 includes monitoring activities conducted in Fall 2021. The total cost of the Calendar Year 2022 monitoring, including payments to be made in 2023, is \$31,400.17 (Dutex—\$8,615; Lafayette Creek—\$7,180; Live Oak Point Living Shoreline—\$3,560; Shuler—\$139.59 for staff time; Tates Hell—\$417.88 for staff time; Ward Creek West—\$6,462; Yellow River Ranch—\$5,026).

been no contingency costs. Adaptive management costs are tied to ongoing restoration/mitigation activities prior to formal site release by the USACE. Some examples of adaptive management include removal of offsite pine, mechanical shrub reduction, herbicide treatment of exotic vegetation, planting of appropriate species, prescribed fire, control of nuisance animals such as feral hog and beaver, site access control such as gating, and hydrologic enhancements (e.g., low-water-crossings, ditch plugs, culverts, breaching of dykes, road removal, and beaver dam removal).

### Credit reporting

The ILF Program was approved in 2015 with an initial balance of 195.98 credits. Since approval of the ILF Final Instrument on 3/18/2015, an additional 50.84 credits have been released and 52.72 credits have been debited. At the beginning of 2022, the balance of available credits was 198.79; at the end of 2022 the balance was 194.10 credits (Table 3). In 2022, a total of 4.69 credits were debited; no credits were released or advanced (Figure 4). The 4.69 credits debited in 2022 were a mixture of Palustrine Forested, Palustrine Emergent, and Estuarine Emergent credits.

As of 12/31/2022, the ILF Program had a balance of 194.10 credits available for immediate use:

- 7.20 Estuarine Emergent
- 14.28 Palustrine Emergent
- 0.37 Palustrine Scrub/Shrub
- 172.25 Palustrine Forested

### Long-term management funding

The NFWFMD ILF Program continues to have sufficient funds to implement mitigation and ensure long-term management in perpetuity (Table 4).

As described in the approved Final Instrument, the price per credit for credits provided to FDOT is governed by section 373.4137, Florida Statutes (price is adjusted annually based on the federal Consumer Price Index). The NFWFMD ILF Program does not provide mitigation credits to non-FDOT entities, except under rare circumstance if allowable under Florida Statutes and with concurrence from FDOT. As stipulated by the Final Instrument, if credits are provided to a non-FDOT entity, the price per credit charged to a non-FDOT entity would be determined from Appendix B of the Final Instrument (updated annually and included in this report as Table 4).

### Annual 2022 summary accounting statement

In 2022, the NFWWMD ILF Program collected \$958,052.27 for reservation and sale of credits.

Construction of a new component of the Live Oak Point ILF project (Live Oak Point Living Shoreline) began in August 2021 (SAJ-2011-00287, amended 3/25/2021; FDEP 0387876-001-EI-66, 5/26/2021) and continued into 2022. Through the end of 2022, approximately 3,440 FT of limerock breakwater had been constructed (out of planned construction of 4,695 FT). To avoid impacts to seagrass that had recently colonized the area, the breakwater construction will be limited to the 3,440 FT already completed (areas where planned breakwaters were not constructed will be closely monitored for erosion; alternative such as coir logs or marsh plantings-only will be considered). Planting of salt marsh species behind completed breakwaters and where breakwaters were planned will occur in spring 2023. Full completion of the Live Oak Point Living Shoreline project is anticipated in 2023.

A total of \$511,743.27 was expended in 2022 on the NFWWMD ILF Program. This represents an increase of \$189,902.22 compared to 2021 expenditures and is primarily explained by construction costs associated with implementation of the Live Oak Point Living Shoreline project as an expansion of the Live Oak Peninsula ILF project. Because of substantial increases in interest rates in 2022, Fund "A" earned \$261,231.98 interest in 2022, as opposed to earning \$19,857.77 interest in 2021. \$27,283.00 was obligated in 2022 for monitoring to be paid in 2023. All earned interest remains in Fund "A" and will be used to implement and maintain NFWWMD mitigation projects. As of 12/31/2022, the fund had a balance of \$14,843,038.90. Currently, \$4.5 million within Fund "A" is reserved for ILF projects (this figure may be adjusted as necessary to guarantee implementation and funding for perpetual management of all ILF projects).

### Advance credits and new projects

No advance credits were issued in 2022 and no new ILF projects were initiated.

### ILF credit ledger balances through 12/31/2022

Notes:

<sup>1</sup> An "Annual Program Report," due to the USACE by March 31<sup>st</sup> of each year, as described in detailed on page 15 of the ILF Final Instrument, requires a "description of NFWFMD ILF Program expenditures/disbursements from the mitigation account (i.e., land acquisition, planning, construction, monitoring, maintenance, contingencies, adaptive management, administration) for the program and by service area."

<sup>2</sup> This column ("2022 Total Expenditures") reports total disbursements of NFWFMD ILF Program funds for each project during Calendar Year 2022 (1/1/2022 - 12/31/2022), as tracked by "MUNIS" software (Tyler Technologies, Inc.). Each ILF project has a unique MUNIS code for tracking of expenditures. Funds obligated in Calendar Year 2022 for payment of Fall 2022 monitoring conducted by the Florida Natural Areas Inventory (FNAI) were paid in January 2023 and are not included in this column. Conversely, funds obligated in Calendar Year 2021 for FNAI Fall 2021 monitoring and paid in Calendar Year 2022 are included in this column.

<sup>3</sup> This column ("Monitoring") reports payments made in Calendar Year 2022 for monitoring activities (Fall 2021 monitoring conducted by FNAI and paid in 2022 is included; Fall 2022 monitoring conducted by FNAI and paid in 2023 is excluded).

<sup>4</sup> Mitigation funds obligated in Calendar Year 2022 for payment of FNAI monitoring conducted in Fall 2022 and paid in Calendar Year 2023.

Column Notes:

A - Project name (Tates Hell has three component sites--Tates Hell Pine Log Creek, Tates Hell Sumatra, and Tates Hell Whiskey George; Live Oak Peninsula also has three component sites--Live Oak Point Woolley, Live Oak Point Lee, and Live Oak Point Living Shorelines).

B, C, D, E, and F - Potential Credits, Released Credits, Debited Credits, Balance of Credits, and Remaining Potential Credits (updated through 12/31/2022).

G - Actual LTD (Life to Date) project expenditures through 12/31/2022 (excludes non-ILF expenditures).

H - Projection of anticipated expenditures from 2023 - 2025 (all restoration activities are expected to be fully implemented at all ILF sites by or before 2025).

I - Projection of total ILF project restoration costs (excluding funds set aside for LTM&M, capital replacements, and contingencies) through 2025.

J - Amount within "Fund A" (NFWFMD dedicated mitigation account) that is set aside for LTM&M. Guarantees of LTM&M for NFWFMD ILF sites include upfront allocation of mitigation funds in "Fund A," future credit sales, statutory mandates, NFWFMD policies, and the binding terms of the NFWFMD ILF Instrument. All revenues obtained from ILF credit sales will be deposited into this account, and interest earned on this account will remain in the account.

K - Amount within "Fund A" (NFWFMD dedicated mitigation account) that is set aside for future capital replacement costs (e.g., low-water-crossings refurbishments, culverts, access). May be used in future for LTM&M if capital replacements not needed.

L - Amount within "Fund A" (NFWFMD dedicated mitigation account) that is set aside for contingencies such as hurricane damage, flooding, or damage caused by feral hogs. May be used in future for LTM&M if contingency funds not needed.

M - Total amount within "Fund A" (NFWFMD dedicated mitigation account) that is set aside for long-term management, capital replacement costs, and contingency planning. [Column M = Columns J + K + L]

N - Projection of total ILF project costs through 2025 (includes projected restoration costs and funds set aside for LTM&M, capital replacement, and contingencies).

O - For information only and not to be confused with the total cost per credit to NFWFMD in perpetuity. Estimated cost per credit to NFWFMD through 2025 (including set aside funds for LTM&M, capital replacement, and contingencies, yet not including perpetual LTM&M).

P - Projected annual LTM&M costs after 2025 after all success criteria have been met.

Q, R & S - Life to Date (LTD) revenues adjusted for non-ILF expenditures.

T - FDOT per-acre funding for direct wetland impacts as governed by section 373.4137, FS. For FDOT Fiscal Year 2023 (July 1, 2022 - June 30, 2023), this amount is set at \$126,738 per acre of direct impact and must also cover the cost of mitigating any indirect or cumulative impacts (e.g., 1 acre of mitigation funding may result in >1 credit or <1 credit being provided to FDOT depending on permit conditions). The per-acre funding from FDOT is adjusted each year based on the federal Consumer Price Index. Mitigation funding from FDOT may be subject to legislative changes in future years.

U - Value of unsold credits if all credits were sold at the current FDOT per-acre funding amount. This is a hypothetical value in that it will be many years, if ever, before all remaining ILF credits are sold, the per-acre funding from FDOT is adjusted annually based on the federal Consumer Price Index, the number of credits required by USACE permits to offset impacted wetland acres will vary from project to project based on functional assessments, (e.g., 1 acre of mitigation funding may result in >1 credit or <1 credit being provided to FDOT depending on permit conditions), and funding from FDOT may be subject to legislative changes in future years.

V - Total revenue if all remaining credits were sold to FDOT at the current per-acre funding provided by section 373.4137, FS. This is a hypothetical value in that it will be many years, if ever, before all remaining ILF credits are sold, the per-acre funding from FDOT is adjusted annually based on the federal Consumer Price Index, the number of credits required by USACE permits to offset impacted wetland acres will vary from project to project based on functional assessments, (e.g., 1 acre of mitigation funding may result in >1 credit or <1 credit being provided to FDOT depending on permit conditions), and funding from FDOT may be subject to legislative changes in future years.

W - End balance of funds if all credits (currently available plus remaining potential) were sold to FDOT at \$126,738 per credit (i.e., the FY 2023 per-acre funding level). This is a hypothetical value in that it will be many years, if ever, before all remaining ILF credits are sold, the per-acre funding from FDOT is adjusted annually based on the federal Consumer Price Index, the number of credits required by USACE permits to offset impacted wetland acres will vary from project to project based on functional assessments, (e.g., 1 acre of mitigation funding may result in >1 credit or <1 credit being provided to FDOT depending on permit conditions), and funding from FDOT may be subject to legislative changes in future years. This hypothetical end balance is revised annually, and should not be considered a requirement of the NFWFMD ILF Program.

X - Projected revised set aside fund for LTM&M if all remaining credits were to be sold to FDOT at the current per-acre funding provided by section 373.4137, FS. Set aside funds may be distributed among projects if necessary to ensure full LTM&M funding. The value in Column X is a theoretical target that will be modified annually. It will be many years, if ever, before all remaining ILF credits are sold, the per-acre funding from FDOT is modified annually based on the federal Consumer Price Index, the number of credits required by USACE permits to offset impacted wetland acres will vary based on functional assessments, and mitigation funding from FDOT may be subject to legislative changes in future years. This target is not to be considered a requirement of the NFWFMD ILF Program.

Y - Projected annual interest return on the target set aside fund for LTM&M fund in Column X. All interest will remain in "Fund A" (NFWFMD dedicated mitigation fund). LTM&M will be funded by "Fund A."

Z - Amount needed in a LTM&M set aside if annual interest alone were to pay for LTM&M in perpetuity. This column is for information only and should be construed as a target, not a requirement. NFWFMD is committed to perpetual LTM&M of all ILF projects. Guarantees of LTM&M for NFWFMD ILF sites include upfront allocation of mitigation funds in "Fund A," future credit sales, statutory mandates, NFWFMD policies, and the binding terms of the NFWFMD ILF Instrument.

AA - Estimated Cost-per-Credit, per USACE guidance, when including the minimum set aside amount necessary (Column Z) to fully fund LTM&M in perpetuity through earned interest alone. Per the USACE, this is the per-credit-rate that would be charged any non-FDOT customers (mitigation provided to FDOT will be funded in accordance with section 373.4137, FS--the "Cost-per-Credit" in Column AA shall not apply to FDOT projects). The value in Column AA will be reviewed and revised as necessary, with USACE approval, on an annual basis.

\*Four million five hundred thousand dollars within "Fund A" is currently allocated for ILF projects, with the remainder being allocated for non-ILF mitigation. "Fund A" will be reallocated, as necessary, among ILF and non-ILF projects to ensure full implementation and long-term management of all ILF projects. As of 12/31/2022, \$14,843,038.90 was available in "Fund A" for NFWFMD mitigation projects.

Appendix A: ILF Credit Ledger through 12/31/2022
